- Lid:** LDPE (food grade)
- Volume:** 800 ml / 27 oz
- Net weight:** 83 g / 0.18 lb
- Ext. Dimensions:** 204 x 147 x 43 mm
- Cleaning:** Dishwasher safe

JOIN THE FOOD REVOLUTION!

Faitron's patent-pending, game-changing heating technology is revolutionizing the mobile food industry. Years ago, before HeatsBox existed, two friends noticed that most of their fellow students were eating cold food out of everyday plastic boxes. Together they discovered that busy schedules and tight budgets made it difficult to eat a hot and healthy meal on-the-go.

Faitron tackles these daily struggles through the development of HeatsBox, the world's fastest portable heating lunchbox. The key innovation inside HeatsBox is Faitron's patent-pending multi-sided heating technology. It allows anyone the convenience and flexibility of having a healthy meal anywhere and anytime within minutes.

- Patent-pending heating technology
- Temperature sensors avoid overheating
- Efficient multi-sided heating
